

Conventional Chat Bot

Key Benefits of Chat Bot Application

- Reduce human interventions
- Enhanced customer satisfaction
- 24/7 Availability
- Customer Service automation

Chat Bot Challenges

- Knowledge Base shortcomings
- Inability to think critical
- Limited Problem-Solving ability
- Lack of contextual understanding

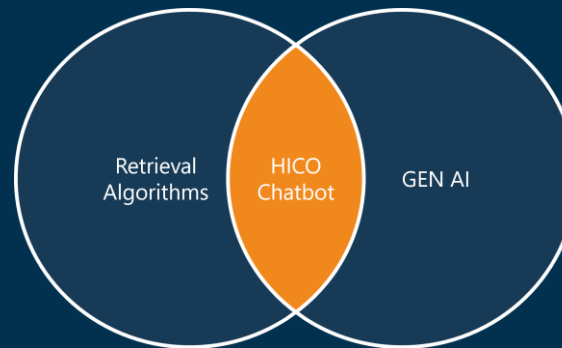

AI-Powered Chat Bot

Artificial Intelligence Powered Chat Bot

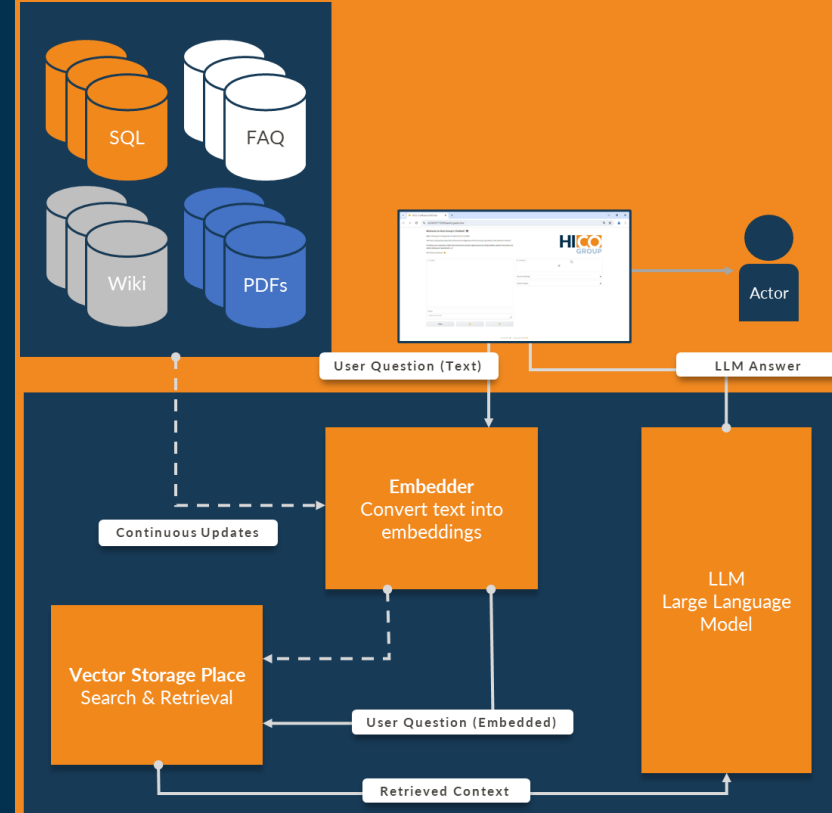

- More versatile and dynamic interactions
- Advanced reasoning capabilities
- Context-aware responses
- Enhanced customer interaction

Next-Gen RAG-Chat Bot

HICO Confluence Chat Bot

Continuous Learning

Validate Context Sources

Role Based Access Control

Qlik AutoML

Key Benefits of Qlik AutoML

- Cost Efficiency
- Real-Time Predictive Analytics
- Automated Feature Engineering
- Seamless Data Integration
- Customized Solutions

Challenges

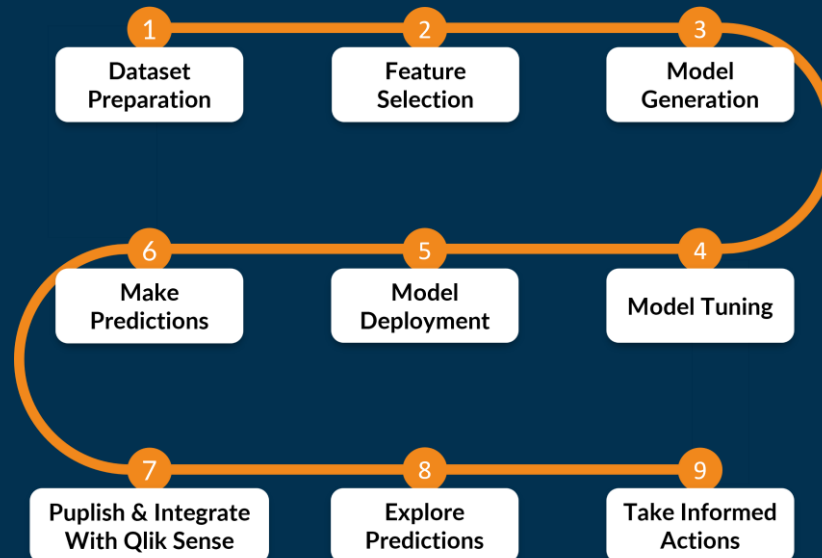

- Limited Customization
- Model Interpretability
- Integration and Extensibility
- Algorithm Variety

Automatic Machine Learning

- Efficiency and Speed
- Cost-Effectiveness
- Enhanced Decision-Making
- Seamless Integration

AutoML Pipeline

Field of Use

Sales

Win/Loss forecasting
Customer churn / retention
Customer prospecting

Marketing

Demand/revenue forecasting
Customer lifetime value
Customer next best offer

Finance

Investment optimization
Expense management
Risk management / reduction

Supply Chain

Inventory stock prediction
Supply chain performance
Transportation optimization

Why

Motivation

- Saves time by automating repetitive tasks
- Integrates multiple systems for efficient cross-departmental operations
- Adapts to individual user needs, increasing engagement

Example Use Cases

- Integrate Power BI reports
- Unify CRM, social media, and feedback data
- Connect Copilot with Jira
- Integrate SAP data with Copilot
- Connect ERP systems with real-time data

Opportunities

- Rapid Deployment
- Enhanced Data Utilization
- Cost-Effective

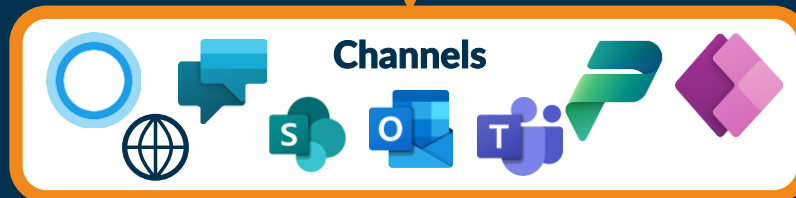

COPILOT COMPANION

Outcomes

Customization Copilot Studio

Environment 1
Agent Copilot

Environment 2
Agent Copilot

Benefits For Your Company

Rapid Deployment

Faster time-to-market
Quick implementation of new features

Enhanced Data Utilization

Integrates multiple data sources
Provides richer insights

Cost-Effective

Lowers development and maintenance costs
Reduces need for extensive custom coding

Improved Efficiency

Automates routine tasks
Increases productivity
